

## GYNECOLOGY – VAGINAL HYSTERECTOMY CLINICAL PATHWAY

**Site:** VCH Coastal Cerner Sites

**Instructions:**

- I. Review once per shift for patient care guideline only. Do not record patient care on this document.
- II. Document all tasks completed and any problems, interventions, and evaluations in CERNER EHR.
- III. Review previous shift documentation - unless documenting on outcomes for the first time.
- IV. **Bolded items are desired patient outcomes/required interventions**

**Within Defined Limits (WDL)**

VS	Monitor VS as ordered.
Sedation Assessment	If Pasero sedation score greater than 2 and/or respiratory rate is 8/min or less: stop all opioids and IMMEDIATELY page Prescribing Provider. Reassess respiratory rate and sedation score q15min for 1h following final dose of naloxone, then q1h for 4h.
Hemoglobin	Notify treating provider if hemoglobin <80.
Vaginal Bleeding	Light to moderate sanguineous discharge, decreasing with each post op day.
Dressing	Change dressings as ordered.
Incision	Incision is clean, free from redness, and is well approximated.
Voiding	Monitor urine output after each void.
Post Void Residual (PVR)	After each void. If post void residual is less than 100 mL or less than 1/3 of voided volume on two consecutive occasions, discontinue trial of void. In & Out Catheterization: if PVR is greater than 300 mL. Insert Urinary Catheter: If unable to void after 3 hours or PVR greater than 300 mL on two occasions insert catheter for 12 hour or teach intermittent self catheterization.

**Patient Resource Materials:**

1)	GG.230.V1741	Before, During and After your Vaginal Hysterectomy or Laparoscopic Assisted Vaginal Hysterectomy
2)	FN.200.P74	Preventing Pneumonia: ICOUGH

<b>Gynecology Abdominal Hysterectomy Clinical Pathway</b>			
<b>Date</b>	<b>PAC</b>	<b>SSCU/Pre-op</b>	<b>Day of Surgery Post-op</b>
<b>NEURO</b> Delirium			Assess/address risk factors: pain, retention, restraint, sensory impairment, lytes, alcohol, meds, hypoxia, nutrition. <b>No evidence of delirium, e.g. confusion, agitation, anxiety</b>
<b>RESP</b> Respiratory impairment	Review iCOUGH Protocol		Follow iCOUGH Protocol if applicable <b>Chest clear</b>
<b>CVS</b> Hypovolemia DVT/PE		<b>VS</b> once, on arrival Prophylactic heparin and antibiotics as ordered.	<b>VS as ordered</b>
<b>Hematology</b> Anemia,	HGB, Cross Match		
<b>GI</b> Nausea/vomiting, constipation		Confirm NPO Status	Diet as ordered <b>No nausea and/or vomiting</b>
<b>GU</b> Urine output, PV loss			Vaginal Bleeding WDL  <b>Voiding WDL (if no urinary catheter)</b> <b>Start trial of Void (if no urinary catheter)</b>
<b>Pain</b>	PCA pamphlet if appropriate		<b>Pain level &lt;4 on pain scale or level acceptable to patient</b>
<b>MUSC/SKEL</b> Mobility	<b>Leg exercises</b>	<b>AAT</b>	<b>Leg exercises</b> <b>Dangle</b>
<b>General</b> Dressing	Pre-op Video		<b>Abdominal Dressing WDL</b>
<b>Psychosocial</b> Fear and anxiety			Nurse will discuss pt's concerns and fears related to surgery and diagnosis
<b>Patient Teaching/ Discharge Planning</b> Pain control, complications, hygiene, activity, constipation prevention	Shower the night before and morning of surgery day. Review current medications and ask re: 7 days before surgery stop taking ASA, NSAIDs, vitamins/herbal preparations. Take regular medications pre-op with a sip of water, unless otherwise ordered. Arrange transport home. Discuss length of stay. Review Pamphlet "" "Before, During and After your Vaginal Hysterectomy or Laparoscopic Assisted Vaginal Hysterectomy"	Confirm regular medications taken pre-op. Reinforce pre- op teaching. Ensure transport arrangements have been made. <b>Patient has a primary support person available</b>	Orient to unit and hospital routine Reinforce pre-op teaching Review pain scale/management Review purpose of lines, tubes drains (PCA, drain, foley cath).  <b>Patient and family understands outcome of surgery</b>

Date	POD 1	POD 2
<b>NEURO</b> Delirium	<b>No evidence of delirium, e.g. confusion, agitation, anxiety</b>	<b>No evidence of delirium, e.g. confusion, agitation, anxiety</b>
<b>RESP</b> Respiratory impairment	Follow iCOUGH Protocol if applicable <b>Chest sounds clear</b>	Follow iCOUGH Protocol if applicable <b>Chest sounds clear</b>
<b>CVS</b> Hypovolemia DVT/PE	<b>VS WDL</b> DVT prophylaxis No evidence DVT/PE	DVT prophylaxis No evidence DVT/PE
<b>Hematology</b> Anemia	<b>Hemoglobin WDL</b>	
<b>GI</b> Nausea/vomiting, constipation	DAT or as ordered Assess for bowel sounds and flatus. DC IV if tolerating fluids <b>No nausea and/or vomiting</b>	DAT or as ordered Assess for bowel sounds and flatus. <b>No nausea and/or vomiting</b>
<b>GU</b> Urine output, PV loss	Vaginal Bleeding WDL Remove vaginal packing at 0600 Remove urinary catheter at 0600 <b>Voiding WDL</b> <b>PVR WDL</b>	Vaginal Bleeding WDL <b>Voiding WDL</b>
<b>Pain</b>	<b>Pain level &lt;4 on pain scale or level acceptable to patient</b>	<b>Pain level &lt;4 on pain scale or level acceptable to patient</b>
<b>MUSC/SKEL</b> AAT Mobility	Wash at sink <b>Up to chair</b> <b>Walking in room/hall</b>	<b>Mobilizing independently</b>
