

Bed and Chair Alarms (Portable) Non-Restraint Alternative

Note: Stryker Med-Surg beds have built in bed exit alarms. These systems are for use on beds without integrated alarms and chairs

Indications:

Used as part of a safety plan for fall prevention (patients deemed high risk with a score 45 or more for falls using the Morse Fall Risk Screen) and when preventing or decreasing the use of physical restraints.

Considerations:

- Attention should be paid to the alarm sound as soon as possible
- With or without the bed alarm in place, side rails on the bed must not all be in the up position. This would be considered a restraint and presents significant risk of harm to the patient when used without other safety measures in place

Protekt Advanced Magnet Alarm

ITEM ID: ORDER DIRECT FROM DISTRIBUTOR
VENDOR ITEM ID: PROTEKT ADVANCED MAGNET ALARM 10240B
<https://proactivemedical.com/products/patient-wandering/alarm-monitors/advanced-alarm-monitor-series/protekt-magnet-alarm-2/>

- Visual signaling - Top mounted flashing lights help to verify that the monitor is armed (slow green flash) and locate the monitor when alarming (fast red flash) - perfect for nighttime use.
- 2 second delay options helps reduce false alarms (for restless residents).
- Mounting bracket – Easily attaches to practically all wheelchairs and beds.
- Low battery alert.
- Operates on one 9V battery (included).
