MEWS / SEPSIS ESCALATION (Inpatient)

Prescriber page	ed:	
	Time:	
Situation	I am calling about: (patient's name and location) I am calling because this patient's condition has changed Current diagnosis: The patient's code status is:	
Background Have access to patient's chart on Cerner when you make the call to prescriber.	The patient is in the hospital because: Change in level of consciousness The patient meets the following (2) SIRS screening criteria: Heart rate greater than or equal to 91/min Respiratory rate greater than or equal to 21/min Temperature 38.3° C or more *OR* less than 36° C WBC more than 12 *OR* less than 4 x 109/L Glucose between 7.82 and 11.1 mmol (patient not diabetic) AND Suspected infection Confirmed infection Consider other relevant clinical information: Breath sounds Skin color CWMS Intake & output	
Assessment	What is your assessment of the situation? I am concerned that the patient possibly has sepsis / septic shock.	
Recommendation	Ask the prescriber: 1. Do you want to initiate the General Sepsis (Adult) power plan on Cerner? The orders include: IV bolus, lactate, blood cultures, and antibiotics If you are taking a verbal/telephone order, ensure the order is immediately transcribed into the patient's health record along with the prescriber's name. Before you end the call, ensure all information is fully documented in the chart, including signing the order, AND repeat all orders back to the prescriber.	
	 2. Are you able to come see the patient within the next 30 minutes? If not, who else can I call? 3. What signs or symptoms should I call you back about? Are you satisfied with the response? If not - Say so "I am concerned" "Help me understand" "I am requesting that you come in and assess this patient" "What is the plan?" 	

Refer to Sepsis protocol on SHOP: Sepsis Early Identification and Treatment Using Cerner EHR Protocol

Please remember that this document is meant solely as an aid for successful communication. If you are comfortable that you have all the information you need, you do not need to use this worksheet. If you do use the worksheet, only fill in the blanks you need. When you have completed your call, and documented the relevant facts in patient's health record, this sheet can be shredded.
