

## Injector Pump: Single Use Syringe Set-Up: Competency Assessment Tool

Name:	Site:	Date:
Auditor/Assessor:	Title:	Date:

Note: To meet Ministry of Health and Provincial Infection Control Network (PICNet) standards, only Medical Radiation Technologists (MRT's) trained and evaluated annually on their performance will be authorized to set up the injector. Authorized users will be in compliance with this standard at all times.

Standard Met	Standard Not Met	Ref. Std	Injector Set-Up Criteria
			Read Single Use Syringe Injector Set-Up prior to hands-on clinical competency evaluation.
Complian	nco Dato: VVVV IV	M DD	ABCD-21-12-90162 Injector Pump Single Use Syringe Set-Up.pdf Observations / Comments:
Compliance Date: YYYY.MM.DD		IIVI.DD	Observations / Comments.
			MRT cleans injector with approved disinfectant wipes or solution (ie. Cavicide or 0.5% Hydrogen Peroxide)
			Note: First wipe cleans, Second wipe disinfects
Compliar	ice Date: YYYY.N	1M.DD	Observations / Comments:
			MRT performs hand hygiene prior to injector set-up as per specific health authority protoco
Compliar	Compliance Date: YYYY.MM.DD		Observations / Comments:
			MRT installs syringes directly onto injector pump after opening packaging.
Compliar	Compliance Date: YYYY.MM.DD		Observations / Comments:
			MRT allows piston(s) to advance completely to remove all air in both syringes prior to loading contrast and saline.
Compliance Date: YYYY.MM.DD		1M.DD	Observations / Comments:
			MRT maintains sterility of connections while removing luer lock caps from contrast and saline syringes and the vented transfer spikes.
Compliar	Compliance Date: YYYY.MM.DD		Observations / Comments:
			MRT attaches vented transfer spikes to contrast and saline syringes, if used.
Compliar	nce Date: YYYY.N	1M.DD	Observations / Comments:
			MRT inspects contrast bottle to ensure the correct product is used, the expiration date,
Complian	nce Date: YYYY.N	MM DD	color, clarity are appropriate and no foreign bodies are present.  Observations / Comments:
Compilar	ice Date. TTTT.iv	IIVI.DD	Observations / Comments.
			MRT removes cap from contrast bottle and disinfects the rubber membrane with a 70% isopropyl alcohol swab using a friction rub technique and ensures it is <b>completely</b> dry prior to spiking.
Compliar	Compliance Date: YYYY.MM.DD		Observations / Comments:
			MRT fully inserts spike at a 90 degree angle into the center of the rubber membrane of the contrast bottle, ensuring the sterility of the spike is maintained.  Note: Contrast bottles must only ever be spiked once
Compliar	ice Date: YYYY.N	1M.DD	Observations / Comments:

	MRT attaches contrast bottle with spike to contrast syringe using the luer lock connection,
	ensuring sterility of connections is maintained.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT inspects saline bag to ensure the correct product is selected and the expiration date,
	color, and clarity are appropriate and no foreign bodies are present.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT removes luer lock cap from vented transfer spike and attaches to saline syringe using
	luer lock connections, ensuring sterility of connections is maintained
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT removes protective cap from vented transfer spike and fully inserts spike into saline
	bag port, ensuring sterility of the connections is maintained.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT fills contrast syringe with prescribed volume.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT fills saline syringe with prescribed volume, if required.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	With injector pointing up, MRT expels all residual air bubbles from the contrast and saline
	syringes, syringe tubing, and patient extension tubing.
	Note: Do NOT apply blunt force using a hand or object to remove air bubbles.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT tips injector head and syringes pointing down.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT ensures the cap on the coiled patient extension tubing is in place and sterility of the
	system is maintained until ready to be connected to the patient.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT activates "Check for Air" button on the injector head.
Compliance Date: YYYY.MM.DD	Observations / Comments:
	MRT clearly labels syringes with time of set-up and initials to validate use.
Compliance Date: YYYY.MM.DD	Observations / Comments:
